

First Edition

November 26 to 28, 2014 Rome, Italy

Organized by:

Overview and objectives of Symposium

EMASST has pleasure to invite you to participate in the *1st* edition of European Symposium on Surface Science to be held at the National Research Council (CNR), Rome, Italy, 26-28 November 2014.

The symposium provides a comprehensive overview of the state-of-the-art in material science, surface physics and chemistry, focusing on discussions related to the recent advances and current challenges, while pointing out the prospective interdisciplinary development of the six industrial fields covered by **EMASST**.

The *European Symposium on Surface Science* will be a unique event to encourage an unprecedented international cross-collaboration amongst research world and industrial world on fundamental and applied surface sciences.

The conference will consider various and new developments, both from an experimental and computational viewpoint. Special emphasis will give to the application of advanced theoretical and experimental approaches as well as multiscale and multidisciplinary approach. In particular the presented novelties will be focused on the potential application and on the industrial fallout.

Participation

European Association of Material Surfaces

Visit the website of the symposium at the following address:

http://emasst.com/1-europeansymposium-on-surfacescience.html

Register now and submit your contribution!!

Main Subjects and Topics

The program of the symposium includes plenary and keynote lectures, oral presentations as well as posters. Oral and poster contributions will be regarded as scientifically equivalent in the program.

Oral and poster contributions must cover the six of the following industrial areas: aeronautical and aerospace, mechanical, energy, electric and electronic, biomedical, chemical.

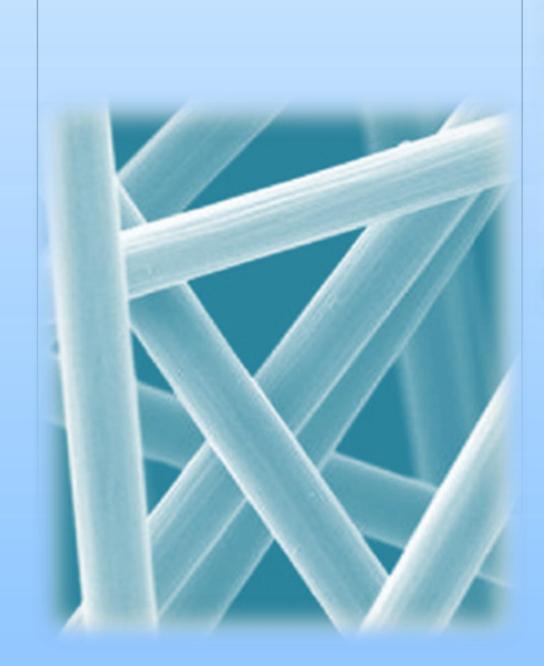

In these six areas will be taken into account contributions on:

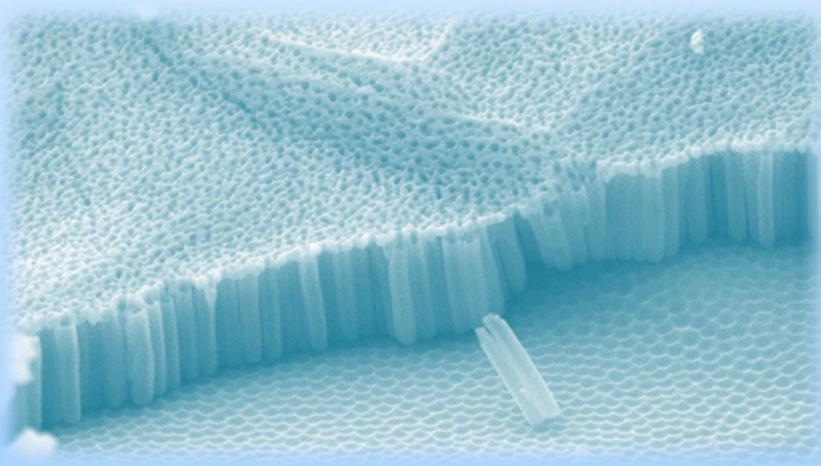

- SMART COATINGS
- SURFACE MODIFICATION
- ADVANCES ON SURFACE CHARACTERIZATION
- NANOTECHNOLOGY AND NANOMATERIALS
- MATERIALS-ENVIRONMENT INTERACTIONS
- ADVANCES ON SURFACE MANUFACTURING AND PROCESSING

Publication of contributes

The short papers presented at the symposium will be permanently archived in the eLibrary of the EMASST website where they are easily accessible to the international scientific community.

In addition EMASST encourage and support to submit a full paper to the special issue of the multidisciplinary peer-reviewed international journal "Surfaces and Interfaces of Materials" (JSIM). The Special Issue entitled "Trends in Material Surfaces Science & Technology" is dedicated to the activities presented to the Symposium. The book will be published in paper and digital format and it will be widely distributed throughout the world. Papers will reference by CrossRef and regularly appear in notable databases, including referencing and abstracting services.

Deadline schedule

DATE	EVENTS	
30 th September, 2014	Final data for submission of Abstract	
15 th October, 2014	Notice of acceptance to Authors	
20 th October, 2014	Final data registration	
31 st October, 2014	Payment of registration fee
